

App. No. 10/771,896  
Amendment Dated: January 27, 2005

**Amendments to the Specification:**

On Page 19, Lines 23-30, please amend the paragraph as follows:

The following examples will be used to illustrate. A Data Source (Work PC) exists on the device that the Work PC is no longer aware of. This can occur for many reasons. For example, it can occur if the user has to reinstall the synchronization program or rebuild the machine. When the device connects to the desktop, the desktop notices that the device already has a data source setup to sync with it (1510). This is determined by comparing the network machine name of the Data Source on the Device with the name of the Work PC. The existing Desktop Source is deleted and a new one is created. ~~The device may~~
